Node JS Tutorial in Hindi #63 Send Email with Node.js (Step-by-Step)

Send Mail with Node js

Points of this video

Install Package

Create Gmail App for send Mails

Write code

Send mail with form

Send Mail with API

Interview Questions

Notes, Code and playlist.

index.file js file code

```
import express from 'express'
import nodemailer from 'nodemailer'

const app = express();

const transporter = nodemailer.createTransport({
  service: 'gmail',
  auth: {
    user: 'webanilsidhu@gmail.com',
    pass: 'gwos xlen vqid jwqx'
  }
});

// app.use(express.urlencoded({extended:false}))
app.use(express.json())
app.set('view engine', 'ejs')
app.get("/mail", (req, resp) => {
  resp.render("mail")
})

app.post("/submit-email", (req, resp) => {
  console.log(req.body);

  const mailOptions = {
    from: 'webanilsidhu@gmail.com',
    to: 'webanilsidhu@gmail.com',
    subject: req.body.subject,
    text: req.body.mail
  }

  transporter.sendMail(mailOptions, (error, info) => {
    if (error) {
      req.send("email operation failed, try again")
    } else {

```

```
        resp.send("mail send")
    }
})

resp.send("email send")

})

app.listen(3200)
```

views/mail.ejs file code

```
<!DOCTYPE html>
<html lang="en">

<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-
scale=1.0">
  <title>Send Mail</title>
</head>

<body>
  <form action="/submit-email" method="post">
    <input type="text" placeholder="enter subject" name="subject">
    <br><br>
    <textarea type="text" placeholder="enter mail" name="mail">
      </textarea>

    <br><br>
    <button>Send Mail</button>
  </form>
</body>
```

</html>
