

Node JS Tutorial in Hindi #64 How to Use TypeScript with Node JS

Node JS Tutorial in Hindi #64 How to Use TypeScript with Node JS

Add TypeScript in Node js

Points of video:-

- Create package.json
- Install NPM packages
- Create config file
- Make src file
- Make index.ts
- Write some code

Add script in package.json

Run Code

Interview Questions

Notes, Code and playlist.

dependencies that need to install

typescript: The TypeScript compiler

ts-node: Allows running TypeScript files directly

@types/node: Type definitions for Node.js APIs

src/index.ts file code

```
const helloUser = (name:string):string=>{  
    return name  
}
```

```
console.log(helloUser("Anil sidhu"));  
console.log(helloUser("saml"));
```
