Node JS Tutorial in Hindi #53 Connect Node.js with MongoDB Using Mon...

Connect MongoDB with Mongoose

Points of video:

Install Mongoose npm package

Connect Node with MongoDB

Write schema for collection

Fetch data and check output

Interview Questions

Notes, Code, and Playlist

index.js File code

```
import mongoose from 'mongoose'
import express from 'express'
import studentModel from './model/studentModel.js';

const app = express();

await mongoose.connect("mongodb://localhost:27017/school").then(()=>{
  console.log("_____connected_____");
})

app.get("/", async (req, resp) => {
  const studentData = await studentModel
  resp.send(studentData)
})

app.listen(3200)

// async function dbConnection() {
//   await mongoose.connect("mongodb://localhost:27017/school");
//   const schema = mongoose.Schema({
//     name: String,
//     email: String,
//     age: Number,
//   })
//
//   const studentsModel = mongoose.model('students', schema);
//   const result = await studentsModel.find();
//   console.log(result);
// }

// dbConnection();
```

schema/studentSchema.js file code

```
import mongoose from "mongoose";

const studentSchema= mongoose.Schema({
  name:String,
  age:Number,
  email:String
})

export default studentSchema;
```
