Cors issues

Points of this video

What is cors issues

Understand issues with API call

Fix Cors issues

Test and verify issues

Interview Questions

Notes, Code and playlist.

What is Cors

CORS stands for Cross-Origin Resource Sharing.

It's a browser security feature

that restricts web pages from making requests to a different domain (origin) than the one that served the web page.

Example :- Below urls are treated as different domains

http://localhost:3000 -----> UI

http://localhost:3200 -----> Node

same as

www.abc.com -----> UI

www.xyz.com -----> Node
